Experience

Internship as Back-End Developer

SESA

Natal, RN, Brazil 08/2022 - 01/2023

- Systems development for SESA sectors, such as SABDP, a system similar to Jira, Asana and ClickUp.
- I kept legacy codes, correcting errors and adding new functions, one of them was leaving an asynchronous system.
- Daily I use PHP and Laravel along with Javascript to develop solutions.
- Creation of documentation for systems maintained by UGTIC (state software development sector).

Junior Developer III

ZapISP

Natal, RN, Brazil 02/2023 - Current

- Assistance in maintaining and enhancing the company's main software, serving over 2 million customers.
- I work with the development team to identify and fix bugs, optimize performance, and implement features, ensuring system scalability and efficiency.

Education

Bachelor of Information System

Universidade Potiguar

Natal, RN, Brazil 01/2019 - 12/2022

- Emphasis on Web Development.
